UJJAWAL SONI

ASPIRING SOFTWARE DEVELOPER

Hardworking, honest, and punctual individual with a strong motivation to excel in a busy work environment. Possesses excellent time management skills and a willingness to learn new skills. Thrives both in a team environment and when working independently. Excels under pressure and meets strict deadlines. Tech enthusiast with a bachelor's degree in computer science and engineering. Strong technical skills in programming, problem-solving, app development, web development, graphic designing, and video editing. Demonstrated leadership abilities as Design Head (2021-2022) and current Secretary of NSS DITU.

PROJECTS

RECIPEGENIE
Personal Project

- Developed personalized recipe generator app based on user-input ingredients for convenient meal planning.
- Designed and implemented intuitive Flutter-based user interface for seamless cross-platform experience.
- Integrated advanced algorithms and extensive recipe database for saving favorites, creating grocery lists, and exploring diverse cuisines.
- GitHub Repo: Link

EXPENSE ANALYSER
Personal Project

- In this app, the user can add their daily expenses which will help them know their total budget remaining and the total amount they have spent.
- Personally, as a student, I have always felt the need for an app that can track my expenses and help me organize my budget.
- The app I have designed is not just for students but also for people across all age groups and will lend a helping hand to all those in need of a practical budget planner.
